INDEX

ACETYLATED monoglycerides and triglycerides, the digestion of, 369.
ALFIN-SLATER, R. B. See Deuel, H. J., Jr., 297.
AMERICAN INSTITUTE OF NUTRITION
Editor of Journal of Nutrition, report of, 1955, 149.
Election of officers for 1955–56, 148.
New members elected, 1955, 151.
Proceedings, 19th annual meeting, 147.
AMES, S. R. See Herting, D. C., 369.
Amino acid(s) of five yeasts grown under controlled conditions, microbiological assay of, 579.
—— low levels of, starches, sugars and related factors affecting liver fat and nitrogen balances in adult rats, 193.
—— mixtures, isoleucine requirements determined with. Studies on the utilization of dietary isoleucine by the growing albino rat. I., 593.
—— and protein requirements of the guinea pig. I. Effect of carbohydrate, protein level and amino acid supplementation, 483.
—— supplements, further observations on the improvement of polish'd rice with protein and, 415.
ANDERSON, B. M., AND H. E. PARKER. The effects of dietary manganese and thiamine levels on growth rate and manganese concentration in tissues of rats, 55.
Antibiotics, relative effectiveness of in rats given limiting B vitamins by mouth or by injection, 61.
Ascorbic acid in the white cells and sera of subjects receiving controlled low intakes of the vitamin. Ascorbic acid nutrition in the human. II., 361.
—— nutrition in the human. II. Content of ascorbic acid in the white cells and sera of subjects receiving controlled low intakes of the vitamin, 361.
ASHTON, G. C. See Liu, C. H., 241.
Aureomycin, effect of on the apparent utilization of vitamin A by the ovariectomized rat, 89.
— effect of on liver storage of vitamin A, and on growth, depletion and survival time of rats, 101.
— (chlortetracycline) and penicillin, influence on the growth and progeny of the guinea pig resulting from oral administration of, 353.

BARTLETT, M. N. Red blood cell niacin and plasma riboflavin levels in a group of normal children, 157.
BAUMANN, C. A. See Jones, C. D., 61.
BEAL, V. A. Nutritional intake of children. III. Thiamine, riboflavin and niacin, 183.
BECKER, D. E. See Ullrey, D. E., 401.
BENTLEY, K. D. See Haldi, J., 215.
BENTLEY, O. G., R. R. JOHNSON, T. V. HERSHBERGER, J. H. CLINE AND A. L. MOXON. Cellulolytic-factor activity of certain short-chain fatty acids for rumen microorganisms *in vitro*, 389.
BIERI, J. G. See Deadrick, R. E., 287.
BLACK, A. L. See Smith, A. H., 497.
Blood biochemical tests. Nutritional status of school children 15 and 16 years of age in three Idaho communities, 29.
— and tissue cholesterol esters, pantothenate and dietary cholesterol in the maintenance of, 121.
BOITER, T. A. See Swell, L., 121.
Bone healing in lysine-deficient rats, 305.
Borden award in nutrition, 1956 announcement, 155; 304; 447; 600; 1955 presentation, 153.
BRING, S. V., K. P. WARNICK AND E. WOODS. Nutritional status of school children 15 and 16 years of age in three Idaho communities; blood biochemical tests, 29.
Butterfat-containing diets, the longevity of rats fed rapeseed oil- or. The biological value of oils and fats, III., 17.

CALCIUM and phosphate in food, effects on radiocalcium accumulation, 555.
CALLOWAY, D. E., AND H. SPECTOR. Nitrogen utilization during caloric restriction. III. The effect of preceding diet, 73.
Caloric restriction, nitrogen utilization during. III. The effect of preceding diet, 73.
CAMPBELL, J. A. See Murray, T. K., 89; 101.
Carbohydrate, high (high protein, high fat and), effect of prenatal and postnatal feeding on dental caries in the albino rat, 215.
— protein level and amino acid supplementation, effect on protein and amino acid requirements of the guinea pig. I., 483.
CARDENAS, R. R., JR. See Deadrick, R. E., 287.
Caries, dental. (See Dental caries)
CATRON, D. V. See Liu, C. H., 241.
Cecum, surgical removal of and its effect on digestion and growth in rabbits, 261.
Cellulolytic-factor activity of certain short-chain fatty acids for rumen microorganisms *in vitro*, 389.
Chick(s) and poults, effect of water intake on the growth response to penicillin, 319.
— growth factors in liver, differentiation of unidentified, 329.
Children, 15 and 16 years of age in three Idaho communities, nutritional status of; blood biochemical tests, 29.
— normal, red blood cell niacin and plasma riboflavin levels in a group of, 157.
— nutritional status of, III. Thiamine, riboflavin and niacin, 183.
CHIN, D. See Edwards, H. M., Jr., 329.
Cholesterol, dietary and pantothenate in the maintenance of blood and tissue cholesterol esters, 121.
— esters, blood and tissue, pantothenate and dietary cholesterol in the maintenance of, 121.
Choline (and riboflavin) deficiencies, effect on water metabolism in rats, 249.

CLINE, J. R. See Bentley, O. G., 389.
Corn, percentage of protein and its nutritional properties, 225.
COUCH, J. R. See Kurnick, A. L., 345.
CRAIG, C. See Michelsen, O., 541.

DEADRICK, R. E., J. G. BIRRI AND R. R. CARDENAS, JR. Effects of octachloronaphthalene on vitamin A metabolism in the rat, 287.
Dental caries in the albino rat in relation to the chemical composition of the teeth and of the diet. I. Effect of prenatal and postnatal feeding of high-protein, high-fat and high-carbohydrate diets, 215.
— — experience in the rat, effect of chronic inanition and frequency of food ingestion on, 441.
DESHPANDE, P. D., A. E. HARPER, F. QUIROS-PEREZ AND C. A. ELVEHJEM. Further observations on the improvement of polished rice with protein and amino acid supplements, 415.
DEUEL, H. J., JR., C. R. MARTIN AND R. B. ALFIN-SLATER. The effect of fat level of the diet on general nutrition. XVI. A comparison of linoleate and linolenate in satisfying the essential fatty acid requirement for pregnancy and lactation, 297.
DIAMANT, E. J. See Guggenheim, K., 249.
Diet(s), chemical composition of, dental caries in the albino rat in relation to. I. Effect of prenatal and postnatal feeding of high-protein, high-fat and high-carbohydrate diets, 215.
— high-fat, production and obesity in rats by feeding. Experimental obesity, I., 215.
— rapeseed oil- or butterfat-containing, the longevity of rats fed. The biological value of oils and fats, III., 17.
Dietary levels of pantothenic acid and reproductive performance of female swine, 401.
Digestion of acetylated monoglycerides and of triglycerides, 369.
— of dietary protein, utilization of sweet potato starch by rats and its effect on, 565.
— and growth in rabbits, surgical removal of the cecum and its effect on, 261.

EDWARDS, H. M., JR., D. CHIN, L. C. NORRIS AND G. F. HEUSER. Differentiation of unidentified chick-growth factors in liver, 329.
Egg production and hatchability, effect of dried whey on growth, 345.
ELVEHJEM, C. A. See Deshpande, P. D., 415; Heinicke, H. R., 483; Schreiber, M., 133.
EZMIRLIAN, F. See MacDonald, N. S., 555.

FAT level of the diet, effect of on general nutrition. XVI. A comparison of linoleate and linolenate in satisfying the essential fatty acid requirement for pregnancy and lactation, 297.
— — and protein utilization. Water restriction in nutrition studies, I., 133.
— high, (high-protein) and high-carbohydrate diets, effect of prenatal and postnatal feeding on dental caries in the albino rat. Dental caries in the albino rat in relation to the chemical composition of the teeth and of the diet. I., 215.
— and oils, biological value of, III The longevity of rats fed rapeseed oil- or butterfat-containing diets, 17.
Fatty acid(s) (essential) requirement for pregnancy and lactation, a comparison of linoleate and linolenate in satisfying. The effect of fat level of the diet on general nutrition. XVI., 297.
— — short-chain, cellulolytic-factor activity of for rumen microorganisms *in vitro*, 389.
FIELD, H., JR. See Swell, L., 121.
FLYNN, L. M. See Hogan, A. G., 225.
Food(s), effects of calcium and phosphate in on radiostrontium accumulation, 555.
— intake and dietary protein, relationship of to pyridoxine nutrition in the rat, 529.
FORBES, R. M. Nathan Zuntz (October 7, 1847 – March 23, 1920), 3.
FORBES, R. M., L. VAUGHAN AND H. W. NORTON. Studies on the utilization of dietary isoleucine by the growing albino rat. I. Isoleucine requirements determined with amino acid mixtures, 593.

GASTRIC secretion, vitamin D and, 469.
GILLESPIE, G. T. See Hogan, A. G., 225.
GORDON, H. A. See Luckey, T. D., 169.
Growth, depletion and survival time of rats, effect of aureomycin on liver storage of vitamin A and, 101.
— egg production and hatchability, effect of dried whey on, 345.
— and progeny of the guinea pig, influence resulting from oral administration of aureomycin (chlortetracycline) and penicillin, 353.
— (and digestion) in rabbits, surgical removal of the cecum and its effect on, 261.
— rate and manganese concentration in tissues of rats, effects of dietary manganese and thiamine levels on, 55.
— response of poults and chicks to penicillin, effect of water intake on, 319.
— vitamin D and, 449.
GUGGENHEIM, K., AND E. J. DIAMANT. Effect of riboflavin and choline deficiencies on water metabolism in rats, 249.
Guinea pig, amino acid requirements of. I. Effect of carbohydrate, protein level and amino acid supplementation, 483.
— — influence on the growth and progeny of, resulting from oral administration of aureomycin (chlortetracycline) and penicillin, 353.

HAGGAR, R., T. D. KINNEY AND N. KAUFMAN. Bone healing in lysine-deficient rats, 305.
HALDI, J., W. WYNN, M. L. LAW AND K. D. BENTLEY, WITH THE TECHNICAL ASSISTANCE OF D. RAMSEY. Dental caries in the albino rat in relation to the chemical composition of the teeth and of the diet. I. Effect of prenatal and postnatal feeding of high-protein, high-fat and high-carbohydrate diets, 215.
HARPER, A. E. See Deshpande, P. D., 415; Heinicke, 483.

NIACIN (thiamine, riboflavin and). Nutritional intake of children. III., 183.
— red blood cell, and plasma riboflavin levels in a group of normal children, 157.
Nitrogen balances in adult rats fed low levels of amino acids, starches and related factors affecting liver fat and, 193.
— utilization during caloric restriction. III. The effect of preceding diet, 73.
NORRIS, L. C. See Edwards, H. M., 329.
NORTON, H. W. See Forbes, R. M., 593.
NOTZOLD, R. R. See Ullrey, D. E., 401.

Nutrition (ascorbic acid) in the human. II. Content of ascorbic acid in the white cells and sera of subjects receiving controlled low intakes of the vitamin, 361.
— studies, water restriction in. I. Level of fat and protein utilization, 133.
Nutritional intake of children. III. Thiamine, riboflavin and niacin, 183.
— studies of school children 15 and 16 years of age in three Idaho communities; blood biochemical tests, 29.

OBESITY, experimental. I. Production of obesity in rats by feeding high-fat diets, 541.
— in rats, production by feeding high-fat diets. Experimental obesity. I., 541.
Octachloronaphthalene, effects of on vitamin A metabolism in the rat, 287.
O'DELL, B. L. See Hogan, A. G., 225.
Oils and fat, biological value of, III. The longevity of rats fed rapeseed oil- or butterfat-containing diets, 17.
O'LEARY, W. M. See Wertman, K., 203.
Osborne and Mendel award in nutrition, 1956 announcement, 156, 303, 448, 599; 1955 presentation, 154.

PANTOTHENATE and dietary cholesterol in the maintenance of blood and tissue cholesterol esters, 121.
Pantothenic acid, dietary levels of and reproductive performance of female swine, 401.
—— requirement of the baby pig, 47.
PARKER, H. E. See Anderson, B. M., 55.
Penicillin, effect of water intake on the growth response of poults and chicks to, 319.
— influence on the growth and progeny of the guinea pig resulting from the administration of aureomycin (chlortetracycline) and, 353.
PEPPER, W. F. See Slinger, S. J., 319.
Phosphate in foods, effects, with calcium, on radiostrontium accumulation, 555.
— transfer of in the digestive tract. I. Swine, 497; II. Sheep, 507.
PIERCE, A. H. See Steele, B. F., 361.
Pig(s), baby, pantothenic acid requirement of, 47.
— growing, fate of urea in, 241.
PLEASANTS, J. R. See Luckey, T. D., 169.
PORTER, T. See Mojonnier, M .L., 579.
Poults and chicks, effect of water intake on the growth response to penicillin, 319.
Pregnancy and lactation, a comparison of linoleate and linolenate in satisfying the essential fatty acid requirement for. The effect of fat level of the diet on general nutrition, XVI., 297.
Protein and amino acid requirements of the guinea pig. I. Effect of carbohydrate, protein level and amino acid supplements, 483.
—— —— —— supplements, further observations on the improvement of polished rice with, 415.
— dietary, and food intake, relationship to pyridoxine nutrition in the rat, 529.
— in corn and its nutritional properties, the percentage of, 225.
— high, high-fat and high-carbohydrate diets, effect of prenatal and postnatal feeding on dental caries in the albino rat. Dental caries in the albino rat in relation to the chemical composition of the teeth and of the diet. I., 215.
— level and amino acid supplementation, effect of on protein and amino acid requirements of the guinea pig, I., 483.
— utilizatilon and level of fat. Water restriction in nutrition studies. I., 133.
—— of sweet potato starch by rats and its effect on the digestion of dietary, 565.
Pyridoxine deficiency, effects of on some physiological factors of importance in resistance to infection, 203.
— nutrition in the rat, relationship of dietary protein and food intake to, 529.

QUIROS-PEREZ, F. See Deshpande, P. D., 415.

RABBITS, digestion and growth in, surgical removal of the cecum and its effect on, 261.
Radiostrontium accumulation, the effects of calcium and phosphate in foods on, 555.
RAMSEY, D. See Haldi, J., 215.
Rapeseed oil- or butterfat-containing diets, the longevity of rats fed. The biological values of oils and fats, III., 17.
Rat(s), adrenalectomized, effect of a preoperative preference for sugar over salt upon compensatory salt selection by, 271.
— adult, fed low levels of amino acids, starches and related factors affecting liver fat and nitrogen balances in, 193.
— albino, dental caries in, in relation to the chemical composition of the teeth and of the diet. I. Effect of prenatal and postnatal feeding of high protein, high fat and high carbohydrate diets, 215.
— dental caries experience in, effect of chronic inanition and frequency of food ingestion on, 441.
— effects of dietary manganese and thiamine levels on growth rate and manganese concentration in tissues of, 55.
— effect of aureomycin on liver storage of vitamin A, and on growth, depletion and survival time of, 101.
— effect of sterile abscesses on serum and tissue vitamin A. Vitamin A metabolism in infection, 277.
— germ-free, some observations on vitamin metabolism in, 169.
— given limiting B vitamins by mouth or by injection, relative effectiveness of antibiotics in, 61.
— growing albino, studies on the utilization of dietary isoleucine by. I. Isoleucine requirements determined with amino acid mixtures, 593.
— longevity of when fed rapeseed oil- or butterfat-containing diets. The biological value of oils and fats, III., 17.
— lysine-deficient, bone healing in, 305.
— ovariectomized, effect of aureomycin on the apparent utilization of vitamin A by the, 89.
— production of obesity in by feeding high-fat diets. Experimental obesity, I., 541.
— relationship of dietary protein and food intake to pyridoxine nutrition in, 529.
— vitamin A metabolism in, effects of octachloronaphthalene on, 287.
— water metabolism in, effect of riboflavin and choline deficiencies on, 249.
Red blood cell niacin and plasma riboflavin levels in a group of normal children, 157.
REID, B. L. See Kurnick, A. L., 345.
REYNIERS, J. A. See Luckey, T. D., 169.
Riboflavin and choline deficiencies, effect of on water metabolism in rats, 249.

— (thiamine) and niacin. Nutritional intake of children. III., 183.
— plasma and red blood cell niacin levels in a group of normal children, 157.
Rice, polished, further observations on the improvement of with protein and amino acid supplements, 415.
ROUNDS, D. E. See MacDonald, N. S., 555.
Rumen microorganisms *in vitro*, cellulolytic-factor activity of certain short-chain fatty acids for, 389.

SALT selection by adrenalectomized rats, effect of a preoperative preference for sugar over salt upon compensatory, 271.
